Education	University	Institute	Year	CGPA
B.E CSD	Anna University	Karpagam College of Engineering	2026	8.05
HSC	State Board	KSV Matric Higher Secondary School	2022	8.4
SSLC	State Board	Mount Giris Matric Higher Secondary School	2020	9.4

SKILLS

Languages : Java , C , Python , HTML ,SQL.
AI/ML : LLMs, Prompt Engineering, Vector Embeddings, Semantic Search, NLP, Multi-Agent Systems, RAG
Frameworks & Tools : FastAPI, React, Pandas, NumPy, OpenAI API, NVIDIA NIM, AgentSDK, FastMCP
Databases & Dev tools : MangoDB, neo4j, ChromaDB, github, gitlab

EXPERIENCE

AI ENGINEER INTERN - Prayag.ai

[Jun 2025]*

- Engineered AI-driven enterprise solutions leveraging LLM architectures and multi-agent systems.
- Built and debugged planning agents using AgentSDK for NLP/LLM orchestration with structured outputs.
- Created intelligent chatbot systems using OpenAI API (GPT-3.5, GPT-4) and multi-agent orchestration patterns.
- Designed and deployed MCP servers in FastAPI environments to optimize contextual data management.
- Integrated Neo4j Graph Database and background worker modules for asynchronous AI tasks.
- Implemented OpenAI embeddings and vector storage to power advanced semantic search.
- Explored speaker diarization pipelines using Pyannote.audio and AWS Transcribe for audio analytics.

Technologies Used: Python, FastAPI, MongoDB, OpenAI API, AgentSDK, FastMCP, AWS Transcribe.

KEY PROJECTS

[EasyHire.ai](#)

[Apr 2025]

- Developed an AI-powered hiring assistant (EasyHire.ai) to automate resume screening and candidate shortlisting using semantic analysis and intelligent scoring **in scalable real-time production environments**

Technologies Used: Python, FastAPI, NVIDIA NIM APIs (Embeddings & LLMs)

[Nanban Fund](#)

[Apr 2025]

- Developed a secure and user-friendly **chit fund management app** for friend-circle , with role-based access allowing users to register monthly payments via QR code and admins to monitor contributions and identify defaulters.

Technologies Used: Node.js, MongoDB, React, JavaScript.

[Salary Prediction](#)

[Feb 2025]

- Developed a **data-driven salary prediction model** using **Linear Regression**, enabling precise salary estimations based on candidate experience, test scores, and interview performance.

Technologies Used: Python, Scikit-learn(linear Regression) , NumPy, Pandas.

CERTIFICATIONS

- | | | | |
|----------------------|--------------|---|------------|
| • Java | - Netstack | - | [Oct 2024] |
| • JavaScript | - IIT Bombay | - | [Mar 2024] |
| • Python | - GUVI | - | [Oct 2023] |
| • Introduction to AI | - Novitech | - | [Jul 2023] |

ACHIEVEMENTS

- Second Prize in UI Design Competition** [Mar '23]
Earned **second place** in a competitive UI design challenge at Kongu Engineering College, outperforming 50 participants with creative and user-centered designs.
- Solved **240+ problems on Leetcode** , **300+ problems across platforms** and earned the **Pandas badge** showcasing foundational data analysis skills.
- HACKATHON** [Nov 2023]
Led a team of 5 members to develop web-based solutions focused on environmental sustainability, using **HTML, CSS, and** Coordinated tasks, managed project timelines, and oversaw the presentation of the final prototype to the judges.
